Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I need to know which crop fits my soil best." • "Fertilizers are expensive and I cannot waste them."	THINKS • Guessing crop types based on history is risky now. • Digital tools look too complex for daily field use.
DOES • Collects local soil samples manually for lab tests. • Tracks daily temperature, humidity, and local rainfall changes.	FEELS • Anxious about sudden crop failures from poor planning. • Overwhelmed by raw multi-variant scientific soil data parameters.
