Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Registration & Farm Setup	Stage 2: Data Ingestion & Environmental Tracking	Stage 3: Crop Yield Optimization & Recommendation
Actions <i>What does the customer do?</i>	• Navigates to OptiCrop digital platform. • Sets up simple land profile boundaries.	• Monitors real-time soil metric logs. • Views automated local weather alerts.	• Reviews smart fertilizer suggestions. • Implements automated irrigation plans.
Touchpoint <i>What part of the service do they interact with?</i>	• Basic landing web page interface. • Registration and profile submission forms.	• Dynamic live weather update feed. • Automated text notification logs.	• Predictive yield analysis graphical chart. • Step-by-step smart advisory modules.
Customer Thought <i>What is the customer thinking?</i>	• "Is this signup process easy?" • "Hope the configuration steps are short."	• "Is the incoming weather data accurate?" • "Will my data update automatically?"	• "This will save massive fertilizer costs." • "Can I execute this schedule right away?"
Customer Feeling <i>What is the customer feeling?</i>	• Hopeful but cautious about complexity. • Satisfied with the clean web entry.	• Reassured by steady data flows. • Engaged with automated updates.	• Highly confident in AI engine guidance. • Relieved to have actionable strategies.

Process Ownership <i>Who is in the lead on this?</i>	G.Harinadh	G.Harinadh	G.Harinadh
Opportunities <i>How can we improve this stage?</i>	• Simplify standard land metric menus. • Add quick tooltips for error handling.	• Implement offline caching for poor signals. • Standardize sensor calibration alerts.	• Integrate predictive simulation modeling. • Expand personalized macro-nutrient tracking.
